

PIEDMONT LITHIUM ANNOUNCES Q3'24 NORTH AMERICAN LITHIUM OPERATIONAL RESULTS

- Piedmont shipped approximately 31,500 dmt of spodumene concentrate in Q3'24; targets 55,000 dmt in Q4
- Record quarterly production of 52,141 dmt, up 5% from Q2'24 as NAL continues to increase production
- NAL achieved mill utilization of 91% and lithium recovery of 67% in Q3'24
- Incident-free safety performance records achieved at NAL in September 2024

BELMONT, North Carolina, October 28, 2024 - Piedmont Lithium (“Piedmont” or the “Company”) (NASDAQ:PLL; ASX: PLL), a leading North American supplier of lithium products critical to the U.S. electric vehicle supply chain, announced that it shipped approximately 31,500 dry metric tons (“dmt”) of spodumene concentrate in Q3'24 as its jointly owned North American Lithium (“NAL”) achieved new quarterly production and operational performance records.¹ NAL, North America’s largest producing spodumene mine, is jointly owned by Piedmont (25%) and Sayona Mining Limited (75%) (ASX: SYA).

In response to a customer request, the Company will shift a planned cargo from Q4'24 to early Q1'25. As a result, Piedmont is targeting shipments of approximately 55,000 dmt of spodumene concentrate in Q4 for total 2024 shipments of approximately 116,000 dmt. While this single cargo push into early 2025 will cause a nominal adjustment from our prior guidance of 126,000 dmt for 2024, we expect this shift to be accretive to our 2025 shipments totals and does not impact Piedmont’s total offtake quantities at NAL.²

In Q3'24, NAL produced 52,141 dmt and shipped 48,992 dmt, of which approximately 31,500 dmt of spodumene concentrate were sold to Piedmont and shipped to Company customers.

NAL increased quarterly production by 5% in Q3'24 compared to the prior quarter. Mill utilization achieved a record high of 91% for the quarter benefitting from the availability of the recently completed crushed ore dome. The increased utilization rate also drove an improvement in unit operating costs, which declined by 15% quarter-over-quarter when excluding the impact of inventory movements. Recoveries dipped marginally in the quarter due to a slight reduction in feed grade and increased use of the WHIMS magnetic separators. Importantly, in September 2024, NAL reported its first incident-free safety month since the restart of operations in 2023 with no lost time injuries, no modified duty injuries, and no medical aid injuries.

“We are pleased to see the benefits from investments made at NAL during the last quarter, with the increase in quarterly production cementing NAL’s status as the largest spodumene producing mine in North America,” said Keith Phillips, President and CEO of Piedmont Lithium. “Operational performance continues to improve on a quarterly basis and Sayona’s recent announcement of the increase to the Mineral Resource Estimate lays the foundation for a potential growth at NAL in the future.”

About Piedmont Lithium

Piedmont Lithium Inc. (Nasdaq: PLL; ASX: PLL) is developing a world-class, multi-asset, integrated lithium business focused on enabling the transition to a net zero world and the creation of a clean energy economy in North America. Our goal is to become one of the largest lithium hydroxide producers in North America by processing spodumene concentrate produced from assets where we hold an economic interest. Our projects include our Carolina Lithium project in the United States and partnerships in Quebec with Sayona Mining (ASX: SYA) and in Ghana with Atlantic Lithium (AIM: ALL; ASX: A11). We believe these geographically diversified operations help us to play a pivotal role in supporting America's move toward energy independence and the electrification of transportation and energy storage.
