

PIEDMONT LITHIUM TO PARTICIPATE IN RANGE OF VIRTUAL INDUSTRY INVESTOR CONFERENCES IN SEPTEMBER

Will provide updates on recent corporate initiatives and investments driving resource and asset diversification

BELMONT, N.C. – Piedmont Lithium Inc., (“Piedmont” or the “Company”) (NASDAQ: PLL; ASX: PLL), a multi-asset company focused on the integrated production of lithium hydroxide to support the North American electric vehicle supply chain, today announced participation in three major industry investor conferences occurring in September:

- H.C. Wainwright 23rd Annual Global Investment Conference, September 13-15, 2021
- Evercore ISI Autotech & AI Forum, September 21-22, 2021
- D.A. Davidson 20th Annual Diversified Industrials & Services Conference, September 22-23, 2021

“We’ve been very active lately as an organization working on a number of different strategic initiatives,” said Piedmont Lithium President and CEO, Keith Phillips. “I’m especially looking forward to speaking with the investor community about our recent participation in the acquisition of North American Lithium in Quebec, as well as our investment in Iron Ridge Resources in Ghana. My goal is to communicate the significance of these two initiatives as they relate to the continued growth of our company, and the value of our diversification from a resource standpoint. This will place us in a strong position to support the North American EV supply chain,” added Phillips.

About Piedmont Lithium

Piedmont Lithium is developing a world-class, multi-asset, integrated lithium business focused on enabling the transition to a net zero world and the creation of a clean energy economy in North America. The centerpiece of our operations, located in the renowned Carolina Tin Spodumene Belt of North Carolina, when combined with equally strategic and in-demand mineral resources, and production assets in Quebec, and Ghana, positions us to be one of the largest, lowest cost, most sustainable producers of battery-grade lithium hydroxide in the world. We will also be strategically located to best serve the fast-growing North American electric vehicle supply chain. The unique geology, geography and proximity of our resources, production operations and customer base, will allow us to deliver valuable continuity of supply of a high-quality, sustainably produced lithium hydroxide from spodumene concentrate, preferred by most EV manufacturers. Our planned diversified operations should enable us to play a pivotal role in supporting America’s move toward decarbonization and the electrification of transportation and energy storage. As a member of organizations like the International Responsible Mining Association, and the Zero Emissions Transportation Association, we are committed to protecting and preserving our planet for future generations, and to making economic and social contributions to the communities we serve.
